

# Ideal Education System in Japan

Oita Uenogaoka High School (2655)

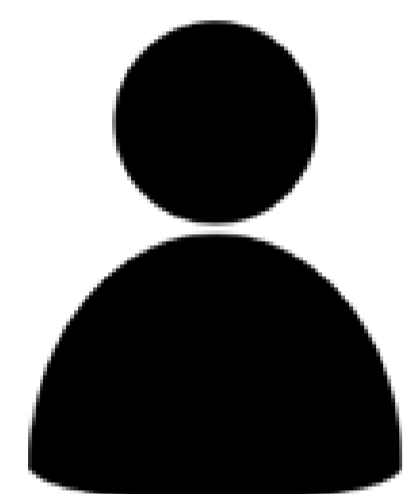

NAME : Sae HIRAYAMA

Sayaka SONODA

## Present Situation

Japanese are lack of **confidence, activeness, assertion** and **English skills**

Foreign students

## Active learning

→ Three problems

### TIME

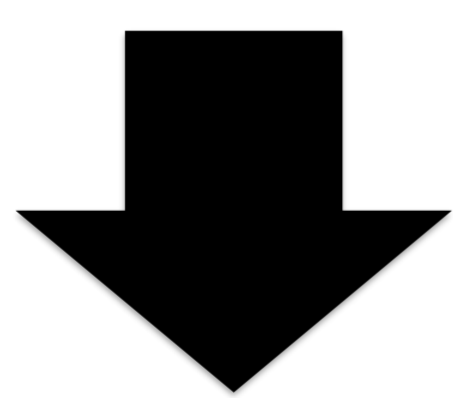

(Short class length)

### ASSESSMENT

(Difficulty of proper evaluation)

### INFORMATION

(Information gap among students)

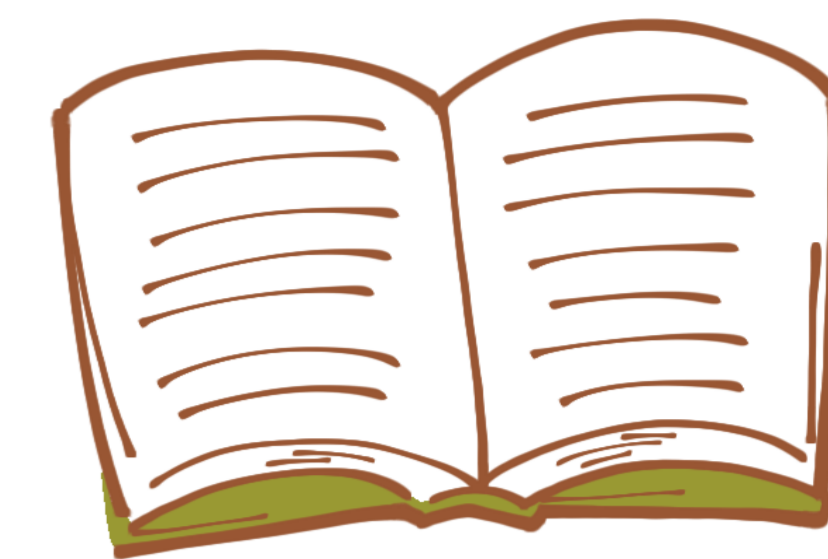

We need ...

1. **Opportunities** to speak English
2. **Confidence** to talk with others in English
3. **Attitude** to think deeply about what is happening (will happen) around us

## Hypothesis

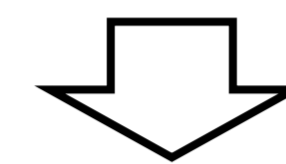

We need to adopt more useful system instead of past active learning in order to improve Japanese education.

## Our Suggestions

### 1. Subjects in English

- Textbook written in English (other than Japanese, and Japanese history)

More opportunities

read, listen  
speak, write

\*Information gap

↳ Introduce iPad

Students

look up words by ourselves  
develop our understanding

× a short-term project

↳ Long-term project

### 2. Small-class Education

How many students do you think is appropriate in one class?	
1 ~ 5	129
6 ~ 10	137
11 ~ 15	74
16 ~ 20	91
21 ~ 25	23
26 ~ 30	24
30 ~ 35	5
36 ~ 40	24
40 ~	5
total	500

( Questionnaire to Uenogaoka senior high school students)

About 40 students → 1~10 students

## Merit

- More opportunities to tell opinions
- More actively and enthusiastically participation

→ Foster the attitude to think deeply

Have more confidence and activeness
