

## Motivation

In the Philippines

Being in poverty = ❌ food + ❌ hope

< Improvements >

Enrollment rate of elementary school in the world

## Aim

• Live independently with hope

Education at elementary school

- Enrollment rate ↑
- Knowledge → better job → income → live independently
- Knowledge → choice → hope

## Our proposal

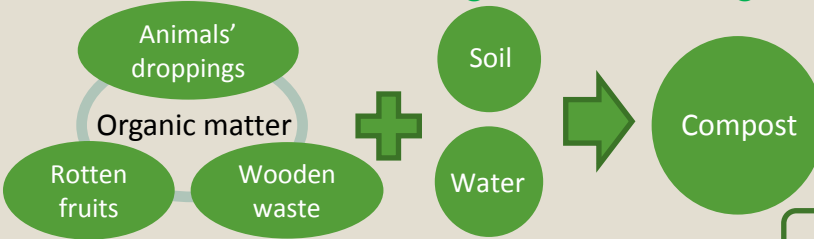

“To improve the opportunities available through education” For poor children

Basic knowledge + Skills for work

## Example

▶ 75% of poor people live in agricultural villages → Agricultural skills like compost

### How to make

1. Gather ingredients
2. Chop up and mix
3. Add water and soil and mix
4. Cover it to keep moisture

• low cost • no special equipment • eco-friendly

Compost can improve

- Fertilizer retention
- Nutrition
- Disease inhibition

## What to do through fieldwork at elementary school

① Make compost

Student can learn  
• What we can use  
• What compost is

② Grow vegetables/crops

Student can learn  
• Function of the compost

③ Eat the vegetables

Student can feel  
• Necessity of compost  
• Sense of accomplishment
